EXPERIENCE

POKEDEX
- Design and development of web versions using the POKÉ API.
- Technologies used: React, HTML, CSS, JavaScript.

RICK AND MORTY APP
- Conceived from the consumption of an API in which a search bar was implemented.
- It has pagination to separate the number of characters to be displayed on screen.
- Technologies used: React, Axios, HTML, CSS.

WEATHER APP
- Built to show real weather data at any location.
- An API is used to interact with this data.
- Technologies used: React, HTML, CSS.

E-COMMERCE
- Project created with the purpose of showing items from a store.
- It has a shopping cart where products are loaded using 'Local Store' to store user information.
- Technologies used: JavaScript, HTML, CSS.

SOFT SKILLS

- Communicative
- Adaptability
- Proactive
- Work ethic
- Collaboration
- Open to learn new skills

ABOUT ME

I am a person with ambition for knowledge and always looking to learn new things. Thanks to the different
skills and abilities that I have achieved, I obtained extensive knowledge in different
technologies that have positioned me as
Full Stack developer.
